Excellence in Engineering

With a Marketing Edge!

The Florida Building Code, the International Building Code, and ASCE 7 are raising the standards in order to protect lives and reduce property damage cost resulting from extreme wind events. The regulatory changes in the building codes call for more evidence of product testing and engineering design for site specific permit submittals.

October 2003, was the effective date for the Florida Building Code, Product Approval System. Envelope products are required to have a Local or State Product Approval.

Code Evaluation Research Reports (CERR) and International Code reports(ICC-ES) can be best evidence of compliance to Building Codes product standards for many products.

CBUCK offers experienced, hands-on, creative solutions to expedite Product Approvals and Local Permitting in order to produce clear, concise engineering that is comprehensible in the marketplace.

James L. (Jimmy) Buckner, P.E, SECB  
President

Experience includes over thirty years in product testing, evaluation, approvals, wind engineering design, owner of a design-build commercial general construction firm and engineer for a national building product manufacturer.

## Professional Registrations

### Licensed Professional Engineer:

Florida #31242 1981  
Georgia #10312 1976  
South Carolina #5906 1975

### Board Certified Structural Engineer:

Certification #1058-0705

### Registered Product Evaluation Engineer:

Florida ANE ID #1916

### Approved Laboratory Test Engineer:

Miami-Dade #02-1104.14 (Inactive)

### Approved 3rd Party Compliance Evaluator

National Storm Shelter Association (NSSA)  
ICC 500-2008 , ICC/NSSA Standard

### Florida Certified General Contractor:

#CG-C019636 (1981)
